**System Protocols**  
TASER REMOVAL

June, 2018

Section 8.32

***Taser Removal (Optional)***

**Pre-Radio**

MFR/EMT/SPECIALIST/PARMEDIC

1. Insure patient is restrained prior to removal of Taser prongs, if necessary.
2. Remove prongs following manufacturer's recommendations.
3. Treat entry wounds, as needed.
4. Obtain a baseline set of vitals and assess patient for potential secondary injuries.
5. If findings are outside of normal limits or patient presents with a medical condition, follow the General Pre-Hospital Care Protocol.

NOTE: Consult local law enforcement to determine manufacture and appropriate means of removal procedure.
